Component 1: Embedded Gallery

Use this if you wish to show a gallery of images within your page using various layouts, with optional full-screen (lightbox-style) viewing.

[Component Inspector Options]

The following are available in addition to the Shared Options described above:

Property	Inspector Name	Description
`galleryLayout`	Gallery Layout	Select a gallery layout; possible values are: - `default` / Default (use the gallery layout set on the plugin settings page) - `gallery_tiles` / Tiles - `gallery_carousel` / Carousel - `gallery_combined` / Combined - `gallery_slider` / Slider Check out the demo site for live examples of each layout.
`tilesLayout`	Tile Layout	Only applicable if the *Gallery Layout* is set to “Tiles”; possible values are: - `default` / Default (use the default gallery layout set on the plugin settings page) - `gallery_tiles_columns` / Columns - `gallery_tiles_justified` / Justified - `gallery_tiles_nested` / Nested - `gallery_tiles_grid` / Grid
`combinedLayout`	Thumbnails Layout	Only applicable if the *Gallery Layout* is set to “Combined”; possible values are: - `default` / Default (use the default thumbnails layout set on the plugin settings page) - `gallery_combined_default` / Normal (default) - `gallery_combined_compact` / Compact - `gallery_combined_grid` / Grid
`additionalGalleryOptions`	Script options	Additional JS options that you want passed onto the UniteGallery script, for example: `theme_panel_position: "bottom"`

Property	Inspector Name	Description
`imageResizerWidth`	Thumbnail Width	Width of the generated thumbnail; Leave empty or set to 0 to only constrain the image by height; leave both width and height empty to fall back on the values set on the backend plugin configuration page
`imageResizerHeight`	Thumbnail Height	Height of the generated thumbnail; Leave empty or set to 0 to only constrain the image by height; leave both width and height empty to fall back on the values set on the backend plugin configuration page
`imageResizerMode`	Thumbnail Mode	Select how to resize your images into thumbnails, or select “default” to use the thumbnail mode set on the plugin settings page; possible values are: - Default - Exact - Portrait - Landscape - Auto - Crop
`galleryWidth`	Gallery Width	Can be a number (pixel lenght) or a percent (of the parent container). Leave empty to fall back on the values set on the backend plugin configuration page
`galleryHeight`	Gallery Height	Only applies to “Combined” and “Slider” galleries! Can be a number (pixel lenght) or a percent (of the parent container). Leave empty to fall back on the values set on the backend plugin configuration page

For an explanation of page propreties, see Page Properties.

Check out the Demo Site for live examples of the above.
