

Component 1: Embedded Gallery

Use this if you wish to show a gallery of images within your page using various layouts, with optional full-screen (lightbox-style) viewing.

[Component Inspector Options]

The following are available in addition to the [Shared Options](#) described above:

Property	Inspector Name	Description
<code>galleryLayout</code>	Gallery Layout	Select a gallery layout; possible values are: <ul style="list-style-type: none">- <code>default</code> / Default (use the gallery layout set on the plugin settings page)- <code>gallery_tiles</code> / Tiles- <code>gallery_carousel</code> / Carousel- <code>gallery_combined</code> / Combined- <code>gallery_slider</code> / Slider Check out the demo site for live examples of each layout.
<code>tilesLayout</code>	Tile Layout	Only applicable if the <i>Gallery Layout</i> is set to “Tiles”; possible values are: <ul style="list-style-type: none">- <code>default</code> / Default (use the default gallery layout set on the plugin settings page)- <code>gallery_tiles_columns</code> / Columns- <code>gallery_tiles_justified</code> / Justified- <code>gallery_tiles_nested</code> / Nested- <code>gallery_tiles_grid</code> / Grid
<code>combinedLayout</code>	Thumbnails Layout	Only applicable if the <i>Gallery Layout</i> is set to “Combined”; possible values are: <ul style="list-style-type: none">- <code>default</code> / Default (use the default thumbnails layout set on the plugin settings page)- <code>gallery_combined_default</code> / Normal (default)- <code>gallery_combined_compact</code> / Compact- <code>gallery_combined_grid</code> / Grid
<code>additionalGalleryOptions</code>	Script options	Additional JS options that you want passed onto the UniteGallery script, for example: <code>theme_panel_position: "bottom"</code>

Property	Inspector Name	Description
<code>imageResizerWidth</code>	Thumbnail Width	Width of the generated thumbnail; Leave empty or set to 0 to only constrain the image by height; leave both width and height empty to fall back on the values set on the backend plugin configuration page
<code>imageResizerHeight</code>	Thumbnail Height	Height of the generated thumbnail; Leave empty or set to 0 to only constrain the image by height; leave both width and height empty to fall back on the values set on the backend plugin configuration page
<code>imageResizerMode</code>	Thumbnail Mode	Select how to resize your images into thumbnails, or select “default” to use the thumbnail mode set on the plugin settings page; possible values are: <ul style="list-style-type: none"> - Default - Exact - Portrait - Landscape - Auto - Crop
<code>galleryWidth</code>	Gallery Width	Can be a number (pixel lenght) or a percent (of the parent container). Leave empty to fall back on the values set on the backend plugin configuration page
<code>galleryHeight</code>	Gallery Height	Only applies to “Combined” and “Slider” galleries! Can be a number (pixel lenght) or a percent (of the parent container). Leave empty to fall back on the values set on the backend plugin configuration page

For an explanation of page propreties, see [Page Properties](#).

Check out the [Demo Site](#) for live examples of the above.
