Component 5: Image List Only

Use this if you wish to write your own Twig script for displaying your images, and only need a list of images (that can be found in a given folder) to be loaded into a page variable.

The image list component does not have any options other than the Shared Options.

Example Page 1

```
<div style="display: flex; flex-wrap: wrap; justify-content: center; align-items: center;">{% for galleryitem in customGallery.gallery.items %}
    <div>
        <a href="{{ galleryitem.url }}" target="_blank">            <img src="{{ galleryitem.url | resize(280, false,  { mode: 'portrait', quality: '90', extension: 'png' }) }}" alt="{{ galleryitem.fileName }}" style="margin: 20px;" />
        </a>
    </div>
{% endfor %}</div>
```

This example assumes that your gallery component has the alias “customGallery” and that you have the Image Resizer Plugin installed. Thumbnails are generated for the images and displayed in a flexbox, with each thumbnail providing a link to the full-resolution image.

Example Page 2

```
<div class="container-fluid">{% for galleryitemchunk in customGallery.gallery.items.sortBy('fileName').chunk(3) %}
    <div class="row">
        {% for galleryitem in galleryitemchunk %}            <div class="col-xs-4" style="text-align: center;">                <a href="{{ galleryitem.url }}" target="_blank">                    <img src="{{ galleryitem.url | resize(280, false,  { mode:
```

```
'portrait', quality: '90', extension: 'png' }) }}" alt="{{ galleryitem.fileName }}"
/>
                </a>
            </div>
        {% endfor %}
    </div>
{% endfor %}</div>
```

Again, we are assuming that your component has the alias “customGallery” and that you have the Image Resizer plugin installed. The images are sorted by filename and “chunked” into groups of 3 images, which are then displayed using the Bootstrap grid layout.

Check out the Demo Site for live examples of the above.
